

Poster Presentations

Can Acute Malnutrition Resolve in the Post-Acute Rehabilitation Phase?

*Rya Clark RDN LD CNSC
TIRR Memorial Hermann*

Collaboration Between Digestive Disease Center and Home Nutrition Support Team: Model to Optimize Patient Outcomes

*Gabriela Gardner RDN-AP, LD, CNSC - Memorial Hermann Hospital
Texas Medical Center,
Karen Martin RD, LD, FAND -American Medical Direct*

Collaborative Approach for Continuity of Care (TPN Clinic)

*Janelle Lustgarten, MS, RDN, LD
Lisa Ronning MS, RDN, LD, CNSC
Omobolaji Olutimehin, MD MPH
Harris Health System*

Does Duration of Therapy of Specialized Amino Acid + HMB (Juven) & Total Protein Intake Affect Wound Healing?

*Hoi Ting (Francis) Wong, MS, RD, CSG, LD
Hienanh (Michelle) Nguyen, RDN, LD, CSOWM
Julia Newsom, MS
TIRR Memorial Hermann*

Efficacy and Efficiency of Electronic Consults in an Outpatient Nutrition Clinic

*Amanda Slover, RD, LD
Shelley Eitel, MS, RD, CDE
Michael E. DeBakey VA Medical Center*

Hang Height of Enteral Nutrition Influences the Delivery of Enteral Nutrition

*Renee Walker, MS, RD,
Lauren Probstfeld, MS, RD, CNSC
Michael E. DeBakey VA Medical Center*

Newest Tool in Wound Management: ADC Managed Protein Supplement (Juven) Enhances Wound Healing

*Dehuti Pandya, PharmD, BCPS
Jamilla Broussard, BSN, RN, WCC
Lynn Dang, PharmD,
Hoi Ting (Francis) Wong, MS, RD, CSG, LD
Hienanh (Michelle) Nguyen, RDN, LD, CSOWM.
TIRR Memorial Hermann*

Overcoming Communication Barriers as an Interdisciplinary Team: Successfully Implementing a Malnutrition Initiative.

*Shweta Misra, MS, RD, LD
Kingwood Medical Center*

Prevalence of Malnutrition in Trauma and Surgical Patients

*Bailey Weiner MCN, RDN, LD, CNSC
Jenny Lee, MS, RD, LD, CNSC
Memorial Hermann Hospital Texas Medical Center*

Use of a Very High Protein Enteral Nutrition Formula Assists in Meeting the Protein Needs of Patients Receiving Intravenous Sedation with Propofol

*Jana Wieser, MS, RD, CNSC, LD
Memorial Hermann Hospital Texas Medical Center*

2017 Malnutrition Symposium

@ Houston Methodist Research Institute
John F. Bookout Auditorium

6670 Bertner Ave, Houston, TX 77030

Tuesday, September 19, 2017

INTENDED AUDIENCE:

MDs, RDs, RNs, & CCMs

RD ATTENDEES MAY RECEIVE

UP TO 5 FREE CPEUs

Courtesy of:

Houston Methodist Hospital

Presentation Topics

2016 Critical Care Guidelines: A Practical Approach to Implementation

*Katie McLean, MS, RD, LD
Houston Methodist Hospital*

This program will describe the multidisciplinary approach needed for multi-unit quality improvement initiatives. The program will identify and analyze opportunities for improvement in achieving nutrition support goals, and will demonstrate how to design individual algorithms for training and implementation of the updated nutrition support guidelines. (For CE)

Capturing Malnutrition in Heart Failure Patients: From Admission to Discharge

*Jenifer Dressel, RD, CNSC, LD
Sabah Waheed, MS, RD, CNSC, LD
Memorial Hermann Hospital
Texas Medical Center*

This program will define the four classes of heart failure. Attendees will learn to recognize signs and symptoms of malnutrition in the heart failure population, as well as understand the nutritional assessment limitations of the perioperative heart failure patient. The program will discuss nutrition interventions and monitoring during the perioperative phase, and describe strategies for improving nutrition in all hospital heart failures patients. (For CE)

Malnutrition Symposium Agenda

7:30 AM Registration/Poster Presentations

9:00 AM Opening Remarks;

Houston Methodist Hospital

9:15 AM **2016 Critical Care Guidelines: A Practical Approach to Implementation**

(For CE)

10:15 AM Break

10:25 AM **Capturing Malnutrition in Heart Failure Patients; From Admission to Discharge**

(For CE)

11:25 AM Break

12:00 PM **Keynote Address & Lunch** (Not for CE)

1:00 PM Break

1:10 PM **Assessment and Treatment of Malnutrition in the Outpatient Setting**

(For CE)

2:10 PM Break

2:20 PM **Enhanced Recovery After Surgery Pathways: A New Standard of Care in Surgery**

(For CE)

3:20 PM Closing Remarks

Assessment and Treatment of Malnutrition in the Outpatient Setting

*Holly Dittmar, MS, RD, CNSC
LaShanda Sullivan MS, RD, LD
Michael E. DeBakey VA Medical Center*

This program will provide the characteristics used to diagnose moderate and severe protein calorie malnutrition in the outpatient setting. Attendees will gain a better understanding of monitoring and evaluating changes in malnutrition severity and how facilitating care across the continuum may optimize nutrition and help prevent re-admissions. The program will also review community resources available to help optimize nutrition. (For CE)

Enhanced Recovery After Surgery Pathways: A New Standard of Care in Surgery

*Pedro T. Ramirez, MD
University of Texas MD Anderson Cancer Center*

This program will provide an insight into the key elements of an Enhanced Recovery After Surgery Program and will demonstrate the comparison between prior surgical practice and the new standard of care under an ERAS Program. The program will show the perioperative outcomes of implementing an ERAS Program with a focus on length of stay, opioid reduction, and patient reported outcomes, and will highlight future components of an ERAS program with a focus on integration of a prehabilitation program and immunonutrition clinical trial. (For CE)
